## Shade Tree Committee

To: Zoning Board  
Re: The Malvern School Properties, LP  
Date: March 15, 2023

The Shade Tree Committee recommends that the alien Japanese Katsura trees be replaced by a native tree species.

In addition, the alien *Tilia cordata* (linden) should be replaced with the native linden (basswood), *Tilia americana*.

*Acer campestre* and *Ilex crenata* appear on some invasive alien lists and should be replaced with native species.

We recommend that another species be substituted for the two varieties of *Arborvitae*, since it is a favorite of deer and likely to be heavily browsed.
