

Project Lifesaver

Project Lifesaver is a unique **bracelet identification-tracking program** for individuals prone to wandering and who have dementia such as Alzheimer's disease or developmental disorders such as Autism or Down Syndrome. The program does not serve as a "sitter," but rather provides extra support to the caregiver and family to keep the loved one in the community.

To register, speak to a Somerset County Office on Aging & Disability Services Specialist at 908-704-6346 or toll-free at 888-747-1122.

Project Lifesaver is a nationally recognized program and is a joint effort between the Somerset County Sheriff's Office and the Somerset County Office on Aging and Disability Services. Find out more on the Somerset County website's [Project Lifesaver page](#).
