## **ENGINEERING DEPARTMENT**

### **IMPORTANT NOTICE**

### **PUBLIC INFORMATION SESSION, Wednesday, June 12, 2019, 4-7 PM**

Dear Resident:

May 30, 2019

A Public Information Session will be held in the **Former Court Room of the Montgomery Township Municipal Building, 2261 Route 206, Belle Mead on Wednesday, June 12, 2019 from 4-7 PM.** Please use the south entrance (right side). All other doors are locked after 4:30 PM so signs will be posted to direct you.

The session will include two (2) upcoming projects:

**1. 2019 Road Improvements project:**

Sycamore Lane, Robin Drive, Oxford Circle:

- a. Full Depth Pavement Reclamation (FDR), ADA curb ramp retrofitting, infrastructure repairs, and repaving.
- b. Installation of new sidewalk on the north side of Sycamore Lane from the existing sidewalk at #66 Sycamore Lane to Montgomery Road.

Rolling Hill Road:

- c. FDR, infrastructure repairs, and repaving.

**2. Blue Spring Road project:** repaving and infrastructure repairs

This session format is informal so you may come in **at any time and duration** in these hours to ask questions, review plan exhibits, and discuss the proposed improvements in your neighborhood. Representatives from the Township Administration, Engineering Department, and Police Department will be available to discuss the project. If you cannot attend, feel free to call us or visit the Engineering Department during normal business hours to review plans.

Please be aware that there will be a **three (3) year restriction on road openings** after paving. This includes utility service connections/upgrades (usually necessary for new additions or certain building work), driveway widening / modifications, and drainage pipe connections to storm sewers. If this affects you, please contact us immediately for permit information and completing work before our project begins.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Herrmann".

Mark Herrmann, PE, CME, CFM  
Assistant Township Engineer
