

Preventing Backups

*Help maintain a healthy sewer system
in our community*

We continue to be proactive in our response to Coronavirus (COVID-19).

Due to this public health emergency our equipment is experiencing blockages from “flushable” and disinfectant wipes.

With the increased use of wipes (“flushable”, wet, baby, anti-bacterial, disinfectant) and paper towels, we are reminding all residents to PLEASE make sure you put these items **IN THE TRASH** and DO NOT FLUSH them down the toilet!

DO NOT FLUSH:

- ¾ Wet wipes
- ¾ Baby wipes
- ¾ Anti-bacterial wipes
- ¾ Disinfectant wipes
- ¾ Paper towels

YOU CAN HELP

Do your part to prevent costly and time consuming equipment blockages or breakdowns and aid in preventing sewer backups.

What Not To Flush

Help maintain a healthy sewer system

We continue to be proactive in our response to Coronavirus (COVID-19).

Due to this public health emergency our equipment is experiencing blockages from “flushable” and disinfectant wipes.

With the increased use of wipes (“flushable”, wet, baby, anti-bacterial, disinfectant) and paper towels, we are reminding all residents to PLEASE make sure you put these items IN THE TRASH and DO NOT FLUSH them down **the toilet!**

Safely flush human waste and toilet paper which easily dissolves in water!

DO NOT FLUSH:

- ¾ Wet wipes
- ¾ Baby wipes
- ¾ Anti-bacterial wipes
- ¾ Disinfectant wipes
- ¾ Paper towels

THE “FLUSHABLE” WIPES MYTH

- Flushable wipes are often marketed as an alternative to toilet paper and claim to be “flushable” and “sewer safe.”
- These wipes DO NOT break down when flushed in both private household plumbing and the public sewer system.
- Serious blockages resulting in septic and sewer backups may occur.
- Disposable wipes, even those labeled ‘flushable’ should be disposed of in the trash, not flushed down the toilet.
