

# SAT, JULY 25<sup>TH</sup> RAIN BARREL WORKSHOP

Build your very own rainwater harvesting system, virtually together!

Join Montgomery Township and The Watershed Institute for a virtual workshop about rainwater harvesting. Learn about water quality in NJ, watershed protection, and 'river-friendly' actions you can implement at home. Participants will pick up rain barrel materials at The Watershed Institute (31 Titus Mill Rd, Pennington) prior to July 25, and then build the rain barrel together on July 25 via a virtual meeting. In addition to building a rain barrel, attendees will be given instructions for installation, care, and appropriate uses.

Visit The Watershed Institute's calendar for details and registration:
